**Footnotes:**

- \* Beginning in school year 2012-13, Schools reported the counts of students claiming each exemption type.
- \*\* Beginning in school year 2006-07, Pertussis is reported separately from Diphtheria and Tetanus.
- \*\*\* Beginning in school year 2012-13, Measles, Mumps and Rubella are reported as the MMR combination.
- \*\*\*\* Beginning in school year 2006-07, Varicella was required for school entry and reported upon.

**Data Notes:**

This summary is based on total counts of kindergartener immunization status as reported by public and private schools with kindergartens to the department.  
Counts include first graders in schools with no kindergarten for school years prior to 2007-2008  
The student immunization status is based on parent-reports to the school and may not be healthcare-provider verified.  
Only schools that reported their student vaccination status report are included in this summary.  
Schools that reported data where the sum of complete, exempt, conditional and out-of-compliance was greater than their reported enrollment were not included in this summary.  
The department makes no other claims about the accuracy of the data as reported by schools.  
The summary data in this report is un-weighted, so does not account for the percentage of actually schools reporting.

**Immunization Status Definitions:**

Complete: The student meets all the school-entry requirements for their age and grade (that is, they are in compliance).  
Exempt: The student has a signed Certificate of Exemption on file at the school excusing the student from one or more vaccinations due to medical, personal or religious beliefs.  
Conditional: The student is missing the required Certificate of Immunization Status or is missing one or more required vaccinations and is making satisfactory progress towards compliance.  
Out-of-Compliance: The student is missing the required Certificate of Immunization Status or is missing one or more required vaccinations.
